

## **DRUG DEVELOPMENT AND R&D COLLABORATIONS WITH THE UK- OVERVIEW OF UK COMPANIES PRESENTING**

### **A4P Consulting Ltd (Preclinical to Phase II)**

A4PBio provides integrated CRO oversight, project management and consultancy services in order to deliver regulatory compliant bio analysis and bio-logistics solutions to the life science sector. A4PBio offer client focused solutions in global laboratory selection, through assay development and validation, study sample analysis and data reporting. Combining this with bespoke logistics solutions for the pro-actively managed transport of time and temperature critical biological samples and cell-based therapies

### **Almac**

Our world class pharmaceutical solutions extend from research, through clinical development to the commercialisation of product. Almac's API and Chemical Development offering provides services for all stages of drug development for small molecules (including highly potent and cytotoxic) and peptides.

### **Aptuit (Discovery, to Phase IIB)**

The Aptuit Center for Drug Discovery & Development in Verona, Italy is known for long-standing scientific expertise in integrated drug discovery and development and its unique understanding of indication-specific drug discovery. It holds a world class reputation in neuroscience discovery and development and other important therapeutic areas.

### **Biotech Services International Ltd (Phase I to Manufacturing)**

Biotech Services International is a pharmaceutical service company specialising in the supply of clinical products, advanced therapy medicinal products (ATMPs), unlicensed medicines and marketed drugs. Biotech differentiates itself by offering packaging and labelling services at 2-8°C and -20°C and offers temperature controlled storage at controlled ambient, 2-8°C, -20°C, -80°C and -196°C.

### **Cyprotex Discovery (Discovery to Preclinical)**

Cyprotex is fully dedicated to pre-clinical pharmacokinetics & drug metabolism (DMPK) and toxicology, including bioanalysis services. Cyprotex are world leaders in accurate in-vitro models for absorption, distribution, metabolism, excretion and toxicology (ADMETox), combined with in-silico and modelling approaches to maximise the translational value of the data. Our focus is on hit-to-lead, lead optimisation and IND submission.

### **Datatrial (Preclinical to Phase III)**

Datatrial design your study with insight and expertise, backed by comprehensive data management, bio-statistical and consulting services. By bridging the gap between the promise of outsourcing and the way results are delivered, we make your clinical study less of a trial.

### **Harlan Laboratories Ltd (Discovery to Phase III )**

Harlan Laboratories is a provider of essential, non-clinical contract research, research models, animal diets, and services to the pharmaceutical, biotech, medical device, agrochemical, and chemical industries, as well as universities, government, and other research organizations. Our focus is on providing customers with product and services to optimize the discovery and safety of new medicines and compounds.

### **Huntingdon Life Sciences (Discovery to Preclinical)**

Huntingdon Life Sciences provides a comprehensive range of services supporting the biopharmaceutical and pharmaceutical industries. With a team of experts, we have become a leading CRO in respiratory safety assessment and non-clinical biologics safety testing and infusion technologies.

### **Molecular Profiles (Preclinical to Phase II)**

Molecular Profiles are specialists in early development and clinical trial manufacturing, with expertise in understanding and formulating drug candidates that possess challenging characteristics. This includes poorly soluble/bioavailable compounds and those which are considered particularly potent.

### **Orion Clinical Services (Phase I to Phase III)**

ORION Clinical Services is a full service, niche Clinical Research Organisation. ORION has experience in many therapeutic areas but we have specialised in complex, hospital-based indications including oncology, HIV, sepsis in ITU patients, Acute Respiratory Distress Syndrome and many others.

### **Parexel (Phase I to Phase III)**

PAREXEL has developed significant expertise across the development and commercialization continuum, from drug development and regulatory consulting to clinical pharmacology, clinical trials management, medical education and reimbursement. Perceptive Informatics, Inc., a subsidiary of PAREXEL, provides advanced technology solutions, including medical imaging, to facilitate the clinical development process.

### **Pharmaterials (Preclinical to Phase II)**

PAREXEL has developed significant expertise across the development and commercialization continuum, from drug development and regulatory consulting to clinical pharmacology, clinical trials management, medical education and reimbursement. Perceptive Informatics, Inc., a subsidiary of PAREXEL, provides advanced technology solutions, including medical imaging, to facilitate the clinical development process.

### **Quotient Bio Analytical Services (Discovery to Phase I)**

Quotient Bio Analytical Sciences is a provider of analytical and specialist drug development services to life sciences clients worldwide. We support discovery, preclinical and clinical studies, drug product formulation and manufacture. Capabilities spans bioanalysis, biomarkers, biopharmaceuticals, microbiology, molecular biology and pharmaceutical sciences.

### **Sequani Ltd (Preclinical to Phase I)**

Sequani is a Contract Research Organisation (CRO), an independent specialist in non-clinical research, performing genetic, general and reproductive (including juvenile) toxicology studies in rodents, dogs and minipigs to support the safety evaluation of pharmaceuticals, veterinary products and chemicals (including agrochemicals).

**Sygnature Discovery Ltd (Discovery)**

Sygnature Discovery is a provider of integrated drug discovery services to pharmaceutical companies, biotechnology companies and academic groups located in UK/Europe and the USA. Founded in 2004 in BioCity Nottingham, Sygnature employs nearly 70 staff, with over 60 laboratory-based medicinal chemists, bioscientists (in vitro biologists) and computational chemists.

**Venn Life Sciences (Phase I to III)**

Venn Life Sciences is a Clinical Research Organisation providing a clinical trial services to pharmaceutical, biotechnology, CROs and medical device organisations. The Venn Group also includes a Clinical Resourcing business placing experienced clinical teams and individuals on projects throughout Europe. Venn is a public company, listed on the AIM stock exchange in London

## Overview

Company	Discovery	Preclinical	Phase I	Phase II	Phase III	Manufacturing
A4PBio		X	X	X
